

New Ideas, Clever Designs

We understand packaging

Perhaps you have a current packaging solution that is, at best, "acceptable".

You know it could be improved, stonger, more durable, with reduced cost per liter/kilo, with enhanced branding, within the new legislative requirements.

Or, maybe, you need new packaging for new products under development, because your current approach is "just not good enough".

We may already have the solution you need or, we can work with you to create a new container that is custom designed to meet your specific needs.

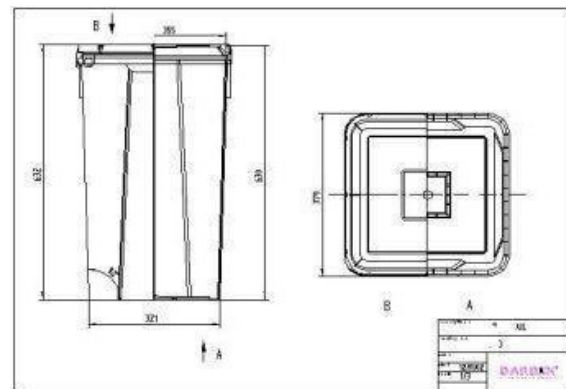

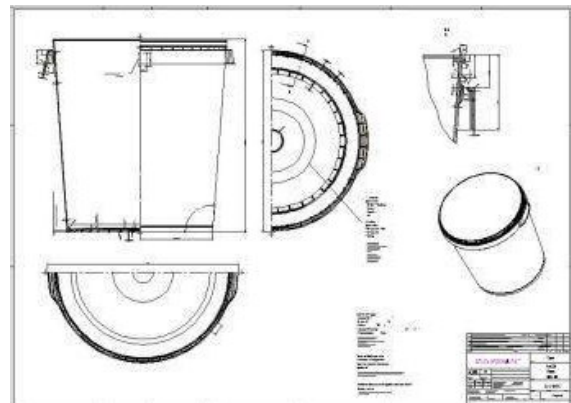

Strongly client oriented, Darbox offers a complete, highly professional, design, project management and support service relating to packaging in general and UN containers in Particular.

From Concept to Reality

Whether you have just an idea, or a complete new concept.

Whether it requires creating new designs or redesigning your existing packaging.

A Darbox design team can guide you from first meeting to homologation and even certification if necessary.

Contact Darbox today, and find out how our innovative solutions will help you meet your packaging challenges.
