

Plastic pails with UN - certification

Darbox SquarePack™ Why "ship air"?

Darbox UN Certified SquarePack containers are real space maximizers, allowing maximum utilization of production, transportation and storage Space.

The dimensions and shapes are designed specifically to fit to the size of standard pallets, transport containers and trucks.

Available in sizes ranging from 12 to 70 litres, these HDPE containers are especially suited for the pharmaceutical, food and chemical industries. The larger sizes have been provided with tamper evidence, ensuring that your goods are delivered safe and secure.

Special features, both in the lid and the container, make the packaging very stable.

Depending on the size of container and the density of the product being packed, they can be stacked up to 3 m high.

Darbox SquarePack containers meet all international codes for the transportation of dangerous goods based on the UN recommendations, including ICAO for air transport, RID/ADR for rail, road and the US Department of Transport (DOT) regulations and are, of course, REACH compliant.

Fully nestable

Tamper evidence ensures safe and undisturbed delivery

**Contact Darbox today, and find out how our innovative solutions
will help you meet your packaging challenges.**
