

Plastic pails with  
-certification

## Darbox SuperPack™ Round Containers with a "Twist"

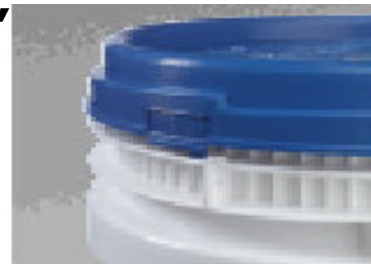

Darbox SuperPack round containers with twist lids are Super Heavy Duty. Especially designed for use in the pharmaceutical, food and chemical industries, they are the strongest High Density Polyethylene pails currently in the market.

These HDPE containers are perfectly suited to replace, for example, fibre drums. They meet all international codes for the transportation of dangerous goods based on the UN recommendations, including ICAO for air transport, RID/ADR for rail and road, the US Department of Transport (DOT) regulations and are, of course, REACH compliant.

Sizes of the round containers with twist lid range from 26 to 53 litres. The closure of the lid is made by a quarter turn, resulting in a child proof lock.

For smaller sizes (11 and 19 litres) press lids with tamper evidence are used.

Available in most colours, they are lightweight, yet strong and do not dent easily, they are neither weather sensitive nor suffer from rust or corrosion and are 100% recyclable. Nestable when empty, they offer considerable savings in expensive warehouse space and transport costs.

A quarter turn of the lid gives a child proof lock

Press lids with tamper evidence for the smaller sizes

Certification Recyclable
